

# ISD 882 COVID Testing Tree

**I'VE BEEN TESTED FOR COVID-19 ... WHAT DO I DO NOW?**

**I have symptoms**

Self-quarantine in isolation if possible. Household contacts must stay home as well

**My test is positive**

Stay home for at least 10 days from symptom onset  
Or until symptoms improve and fever free for at least 24 hours  
Seek guidance from your medical provider regarding testing of other family members  
Household contacts must stay home at least 10 days even if symptoms develop

**My test is negative**

Stay home until symptoms improve and you are fever-free for 24 hours  
Household contacts with no symptoms can return to work

**I don't have symptoms but I have had close contact with confirmed positive case**

**Best practice is to wait five days after contact before testing**

Self-quarantine until you get test results

**My test is positive**

Stay home 10 days from test date  
Household contacts must stay home 10 days

**My test is negative**

Stay home at least 10 days from last contact  
Household contacts with no symptoms can return to work

**If symptoms develop at any time, stay home at least 10 days from symptom onset, regardless of test results, UNLESS you have an alternative diagnosis. All symptoms must be improved before you can return to work/school.**
